PROFILE SUMMARY

Software Engineer with **4+ years** building distributed systems and platform infrastructure at scale. Scaled backend services to **4,000 RPS** for **40M+ users**, led zero-downtime cloud migrations, and maintained full-stack SDKs with **21M+ monthly installs**. Experienced across event-driven architectures, relational and NoSQL databases, Java services, and TypeScript/React front-ends. Strong in technical direction, design-doc-driven delivery, and cross-team collaboration.

EXPERIENCE

Software Development Engineer 2, Authn-SDKs | Auth0 (Okta)

July 2024 – Present

Primary maintainer of nextjs-auth0 (21M+ monthly downloads, 141% growth in tenure)

Bangalore, India

- **Cross-SDK Features:** Delivered DPoP (proof-of-possession tokens), token exchange, and organization-scoped auth across Next.js, SPA, and Node SDKs via async and event-driven patterns. Cut 31 releases across 3 packages in 16 months.
- **Multi-Domain Support:** Rewired SDK from single-domain to dynamic per-request domain resolution. Customers with multiple brands now use one SDK instance. Zero breaking changes, sessions auto-migrate.
- **New SDK (auth0-hono):** Built and shipped a new authentication SDK for the Hono framework from scratch. 8,100+ lines of code, 291 tests, runs on Node, Cloudflare Workers, Deno, and Bun. Gap analysis to shipping in 4 weeks.
- **Multi-Factor Auth (MFA):** Shipped full MFA step-up support for Next.js SDK. First server-side Auth0 SDK with this capability. Design to production in 5 weeks.
- **Security:** Patched critical Next.js cache poisoning vulnerability (affected all Next.js users globally). Resolved auth parameter injection bugs in coordination with the security team.
- **Technical Direction:** Authored 15+ design docs adopted across teams. Proposed and got approval for 10+ architecture decisions in cross-team reviews. Mentored junior engineers and interns.

Software Development Engineer 1, B2B-Subscriptions | ZEE5

August 2022 – July 2024

Scaling video streaming platform for 65M+ monthly active users

Bangalore, India

- **Mirage:** Built high-throughput token exchange service handling **4,000 requests/sec**, powering cross-platform streaming for **40M+ B2B users** (60% of ZEE5's revenue base).
- **Cloud Migration:** Led zero-downtime AWS to GCP migration including PostgreSQL to Cloud Spanner for **5M+ daily auth events**. Cut DB latency to under 10ms.
- **Subscription Engine:** Built async subscription orchestrator with automatic failover. Hit **99.9% uptime** on revenue-critical B2B flows while cutting cloud spend.
- **Platform Rewrite:** Migrated Node.js services to Java WebFlux. **10x throughput** improvement, zero regressions, zero customer-facing downtime.

KEY PROJECTS

OPAL: Real-time Log Analytics (Auth0 Hackathon Finalist) | ClickHouse, S3, Benthos, Cube.js

- Built analytics engine ingesting **13k events/sec** for customer usage insights. Estimated **\$70k/month savings** over existing solution.
- Column-oriented storage with 130:1 write-read efficiency. Live dashboards and log search integrated into product UI.

Forge: AI Development Workflow Engine | Claude Code, TypeScript, State Machines

- Built a multi-phase AI orchestrator automating the full software lifecycle: requirements, design, implementation, review, and documentation.
- Used to ship two major SDK features (MFA and Multi-Domain). Adopted by team for AI-assisted development.

TECHNICAL SKILLS

Languages: Java, TypeScript, Python, Go

Infrastructure: PostgreSQL, Cloud Spanner, Redis, Kafka, ClickHouse, Cloudflare Workers, Docker

Frameworks: Spring WebFlux, Node.js, Next.js, React, Hono, Vitest

Auth/Identity: OAuth 2.0/2.1, OIDC, DPoP, MFA, PKCE, Token Exchange, Session Management

Practices: Distributed systems design, event-driven architecture, data modeling, design-doc-driven delivery, technical leadership, security review

EDUCATION

BMSIT, Bangalore

2018 – 2022

Bachelor of Technology, Computer Science

Bangalore, India
