PROFILE SUMMARY

Backend engineer with **4+ years** building security-critical SaaS infrastructure and cloud-native microservices. Primary maintainer of a developer-facing SaaS SDK with **21M+ monthly installs** and deep experience in identity, access management, and control-plane services. Strong Go and Java background, security and compliance track record, and 99.9% uptime delivery on production systems. Thrives in high-ownership, cross-functional environments.

EXPERIENCE

Software Development Engineer 2, Authn-SDKs | Auth0 (Okta)

July 2024 – Present

Primary maintainer of nextjs-auth0 (21M+ monthly downloads, 141% growth in tenure)

Bangalore, India

- **Security & Compliance:** Patched critical Next.js cache poisoning vulnerability affecting all Next.js users globally — coordinated cross-team fix, owned disclosure, and drove rollout across the SDK ecosystem. Resolved auth parameter injection bugs under responsible disclosure. Operated under enterprise-grade security review standards throughout.
- **Access Management APIs:** Designed and shipped API contracts for token exchange, DPoP, org-scoped auth, and MFA across the Auth0 SDK suite. Owned the control-plane integration layer between SDKs and Auth0's identity platform — directly analogous to Clumio's user-access management and control-plane services.
- **New SDK (auth0-hono):** Built and shipped a new open-source SDK from scratch. 8,100+ lines of Go-style TypeScript, 291 tests, multi-runtime (Node, Cloudflare Workers, Deno, Bun). Shipped in 4 weeks.
- **High-Availability Architecture:** Rewired SDK from single-domain to dynamic per-request resolution with zero breaking changes and automatic session migration — migration-safe architecture under live production load.
- **Technical Direction:** Authored 15+ design docs. Drove 10+ architecture decisions in cross-team reviews. Mentored junior engineers and interns. Improved team delivery practices through design and code review.

Software Development Engineer 1, B2B-Subscriptions | ZEE5

August 2022 – July 2024

Scaling video streaming platform for 65M+ monthly active users

Bangalore, India

- **Cloud Migration:** Led zero-downtime **AWS to GCP** migration including PostgreSQL to Cloud Spanner for 5M+ daily events. Full schema migration, query rewrite, and rollback strategy. Cut DB latency to under 10ms.
- **Platform Rewrite:** Migrated Node.js services to **Java WebFlux** with zero regressions and zero customer-facing downtime. **10x throughput** improvement. Owned the migration architecture end to end.
- **Mirage:** Built distributed microservice handling **4,000 requests/sec** for **40M+ B2B users** (60% of ZEE5's revenue). Async processing, retry logic, multi-region reliability.
- **Subscription Engine:** Built async orchestrator with automatic failover. **99.9% uptime** on revenue-critical flows while cutting cloud spend.

KEY PROJECTS

OPAL: Real-time Log Analytics (Auth0 Hackathon Finalist) | ClickHouse, S3, Kafka, Benthos, Cube.js

- Built streaming analytics pipeline ingesting **13k events/sec** with operational dashboards and log search. Estimated **\$70k/month savings**. End-to-end ownership from design to production deployment.

Forge: Agentic AI Development Workflow Engine | TypeScript, Claude Code, State Machines

- Built multi-phase agentic AI orchestrator for the full software lifecycle. Used to ship two major production features. Adopted by team.

TECHNICAL SKILLS

Languages: Go, Java, TypeScript, Python

Frameworks: Spring WebFlux, Node.js, Next.js, Hono

Infrastructure: Docker, GCP, Cloudflare Workers, CI/CD, Kafka

Databases: PostgreSQL, Cloud Spanner, Redis, ClickHouse, MySQL

Auth / Security: OAuth 2.0/2.1, OIDC, DPoP, MFA, PKCE, IAM, responsible disclosure

Practices: SaaS platform ownership, security review, production on-call mentality, design-doc-driven delivery, mentoring, Agile

EDUCATION

BMSIT, Bangalore

Bachelor of Technology, Computer Science

2018 – 2022

Bangalore, India
