PROFILE SUMMARY

Senior backend engineer with **4+ years** building distributed systems, open-source developer platforms, and production agentic AI tools. Primary maintainer of an OSS SDK with **21M+ monthly installs**; shipped Java services at **4,000 RPS**, led cloud-native migrations, and built agentic AI workflow engines used in production. Deep in backend architecture, API design, and PostgreSQL/ClickHouse at scale. Strong written communicator; thrives in async, high-autonomy environments.

EXPERIENCE

Software Development Engineer 2, Authn-SDKs | Auth0 (Okta)

July 2024 – Present

Primary maintainer of nextjs-auth0 (21M+ monthly downloads, 141% growth in tenure)

Bangalore, India

- **Technical Direction:** Authored 15+ design docs adopted across teams. Drove 10+ architecture decisions in cross-team async reviews. Mentored junior engineers and interns. Defined backend standards for API contracts, testing, and release management across the SDK ecosystem.
- **Backend Architecture & APIs:** Designed and shipped token exchange, DPoP, org-scoped auth, and MFA APIs across Next.js, SPA, and Node SDKs. Made pragmatic trade-offs between shared components and independently operated services. 31 releases across 3 packages in 16 months.
- **Migration-Safe Design:** Rewired SDK from single-domain to dynamic per-request resolution with zero breaking changes and automatic session migration. Designed for incremental rollout under live production load.
- **New SDK (auth0-hono):** Built and shipped open-source SDK from scratch. 8,100+ lines of code, 291 tests, multi-runtime (Node, Cloudflare Workers, Deno, Bun). 4 weeks gap analysis to production.
- **Security:** Patched critical Next.js cache poisoning vulnerability affecting all Next.js users globally. Owned incident coordination and cross-team fix. Resolved auth parameter injection bugs under responsible disclosure.

Software Development Engineer 1, B2B-Subscriptions | ZEE5

August 2022 – July 2024

Scaling video streaming platform for 65M+ monthly active users

Bangalore, India

- **Platform Rewrite:** Migrated Node.js monolith to **Java WebFlux** microservices. **10x throughput**, zero regressions, zero downtime. Defined the migration architecture and owned it end to end.
- **Cloud Migration:** Led zero-downtime **AWS to GCP** migration including **PostgreSQL to Cloud Spanner** for 5M+ daily events. Schema migration, query rewrites, rollback strategy. Cut DB latency to under 10ms.
- **Mirage:** Built distributed microservice handling **4,000 requests/sec** for **40M+ B2B users** (60% of ZEE5's revenue). High-throughput async Java backend with retry logic.
- **Subscription Engine:** Built async orchestrator with automatic failover. **99.9% uptime** on revenue-critical flows while cutting cloud spend.

KEY PROJECTS

Forge: Agentic AI Workflow Engine | TypeScript, Claude Code, State Machines

- Built a production agentic AI system that goes beyond prompt engineering: structured state machines coordinate multi-phase loops (requirements, design, implementation, review, documentation), with tool-use, phase-boundary checkpoints, and conditional routing to handle failure modes reliably.
- Used daily in production feature delivery at Auth0. Shipped MFA and Multi-Domain features with it. Adopted by team.

OPAL: Real-time Log Analytics (Auth0 Hackathon Finalist) | ClickHouse, PostgreSQL, Kafka, Benthos, Cube.js

- Built streaming analytics pipeline ingesting **13k events/sec** with **ClickHouse** column-oriented storage (130:1 efficiency) and live dashboards. Estimated **\$70k/month savings**.
- Architecture: stream (Kafka/Benthos) → durable columnar store (ClickHouse) → low-latency query layer (Cube.js).

TECHNICAL SKILLS

Languages: TypeScript, Java, Go, Python, Rust (learning)

Frameworks: Spring WebFlux, Node.js, Next.js, Hono

Databases: PostgreSQL, ClickHouse, Cloud Spanner, Redis, MySQL

Streaming / Infra: Kafka, Docker, GCP, Cloudflare Workers, CI/CD

AI / Agentic: Production agentic systems, LLM tool-use, state machine orchestration, prompt engineering

Practices: Open-source maintenance, async written communication, design-doc-driven delivery, architecture review, mentoring, security review

EDUCATION

BMSIT, Bangalore

Bachelor of Technology, Computer Science

2018 – 2022

Bangalore, India
