+919380611436 | tusharpandey13@gmail.com | linkedin.com/in/tusharpandey13 | github.com/tusharpandey13

PROFILE SUMMARY

Software Engineer with **4+ years** building backend Java services, full-stack web applications, and security-critical infrastructure. Migrated production databases at scale, shipped microservices handling **4,000 RPS**, and maintained open-source SDKs with **21M+ monthly installs**. Strong in test-driven development, code review, and continuous delivery across Agile teams.

EXPERIENCE

Software Development Engineer 2, Authn-SDKs | Auth0 (Okta)

July 2024 – Present

Primary maintainer of nextjs-auth0 (21M+ monthly downloads, 141% growth in tenure)

Bangalore, India

- **New SDK (auth0-hono):** Built and shipped a new authentication SDK for the Hono framework from scratch. 8,100+ lines of code, **291 tests**, runs on Node, Cloudflare Workers, Deno, and Bun. Gap analysis to shipping in 4 weeks.
- **Security:** Patched critical Next.js cache poisoning vulnerability (affected all Next.js users globally). Resolved auth parameter injection bugs in coordination with the security team.
- **Multi-Factor Auth (MFA):** Shipped full MFA step-up support for Next.js SDK — challenge, verify, and enroll factors natively. First server-side Auth0 SDK with this capability. Design to production in 5 weeks.
- **Cross-SDK Features:** Delivered DPoP (proof-of-possession tokens), token exchange, and organization-scoped auth across Next.js, SPA, and Node SDKs via RESTful APIs and microservice patterns. Cut 31 releases across 3 packages in 16 months.
- **Multi-Domain Support:** Rewired SDK from single-domain to dynamic per-request domain resolution. Zero breaking changes, sessions auto-migrate.
- **Code Quality:** Authored 15+ design docs, led code reviews, and participated in cross-team architecture reviews. Mentored junior engineers and interns.

Software Development Engineer 1, B2B-Subscriptions | ZEE5

August 2022 – July 2024

Scaling video streaming platform for 65M+ monthly active users

Bangalore, India

- **Platform Rewrite:** Migrated Node.js services to **Java WebFlux**. 10x throughput improvement, zero regressions, zero customer-facing downtime.
- **Mirage:** Built high-throughput microservice handling **4,000 requests/sec**, powering cross-platform streaming for 40M+ B2B users (60% of ZEE5's revenue base).
- **Cloud Migration:** Led zero-downtime AWS to GCP migration including **PostgreSQL to Cloud Spanner** for 5M+ daily events. Cut DB latency to under 10ms.
- **Subscription Engine:** Built async subscription orchestrator with automatic failover. Hit **99.9% uptime** on revenue-critical B2B flows while cutting cloud spend.

KEY PROJECTS

OPAL: Real-time Log Analytics (Auth0 Hackathon Finalist) | ClickHouse, S3, Benthos, Cube.js

- Built analytics engine ingesting **13k events/sec** with live dashboards and log search. Estimated **\$70k/month savings** over existing solution.
- Column-oriented storage with 130:1 write-read efficiency. Integrated into product UI via RESTful APIs.

Forge: AI Development Workflow Engine | TypeScript, Claude Code, State Machines

- Built a multi-phase AI orchestrator automating the full software lifecycle: requirements, design, implementation, review, and documentation.
- Used to ship two major SDK features (MFA and Multi-Domain). Adopted by team for AI-assisted development.

TECHNICAL SKILLS

Languages: Java, TypeScript, Python, Go

Frameworks: Spring WebFlux, Node.js, Next.js, React, Hono, Vitest

Databases: PostgreSQL, Cloud Spanner, Redis, ClickHouse, MySQL

Infrastructure: Docker, Kafka, Cloudflare Workers, GCP

Auth/Security: OAuth 2.0/2.1, OIDC, DPoP, MFA, PKCE, PKI concepts, Token Exchange

Practices: Agile/Scrum, TDD, code review, CI/CD, microservices, RESTful API design

EDUCATION

BMSIT, Bangalore

Bachelor of Technology, Computer Science

2018 – 2022

Bangalore, India
