PROFILE SUMMARY

Software Engineer with **4+ years** building Java-based microservices, high-throughput transaction processing systems, and real-time data pipelines. Scaled services to **4,000 RPS** for 40M+ users, led zero-downtime database migrations at scale, and built streaming analytics ingesting **13k events/sec**. Experienced in event-driven architectures, RESTful API design, Redis, Kafka, and SQL at scale. Built agentic AI orchestration tools used in production.

EXPERIENCE

Software Development Engineer 2, Authn-SDKs | Auth0 (Okta)

July 2024 – Present

Primary maintainer of nextjs-auth0 (21M+ monthly downloads, 141% growth in tenure)

Bangalore, India

- **Cross-SDK Platform:** Delivered DPoP tokens, token exchange, and org-scoped auth across Next.js, SPA, and Node SDKs via RESTful microservice patterns. Cut 31 releases across 3 packages in 16 months. Owned API contracts, data modeling, and integration with external identity providers.
- **New SDK (auth0-hono):** Built and shipped a new SDK for the Hono framework from scratch. 8,100+ lines of code, 291 tests, multi-runtime (Node, Cloudflare Workers, Deno, Bun). Gap analysis to shipping in 4 weeks.
- **Multi-Factor Auth (MFA):** Shipped full MFA step-up support for Next.js SDK. Design to production in 5 weeks.
- **Security & Compliance:** Patched critical Next.js cache poisoning vulnerability affecting all Next.js users globally. Resolved auth parameter injection bugs in coordination with the security team. Operated under the highest standards of security review and responsible disclosure.
- **Technical Direction:** Authored 15+ design docs adopted across teams. Drove 10+ architecture decisions in cross-team reviews. Mentored junior engineers and interns.

Software Development Engineer 1, B2B-Subscriptions | ZEE5

August 2022 – July 2024

Scaling video streaming platform for 65M+ monthly active users

Bangalore, India

- **Mirage:** Built high-throughput transaction processing service handling **4,000 requests/sec**, powering revenue-critical B2B streaming for **40M+ users** (60% of ZEE5's revenue base). Java backend with async processing and automatic retry.
- **Subscription Engine:** Built async subscription orchestrator with automatic failover handling multi-step payment and entitlement flows. Hit **99.9% uptime** while cutting cloud spend. Analogous to settlement and reconciliation workflows in structure and reliability requirements.
- **Cloud Migration:** Led zero-downtime AWS to GCP migration including **PostgreSQL to Cloud Spanner** for 5M+ daily transactional events. Cut DB latency to under 10ms. Full schema migration, query optimization, and rollback strategy.
- **Platform Rewrite:** Migrated Node.js services to **Java WebFlux**. **10x throughput** improvement, zero regressions, zero downtime.

KEY PROJECTS

OPAL: Real-time Log Analytics (Auth0 Hackathon Finalist) | ClickHouse, S3, Kafka, Benthos, Cube.js

- Built streaming analytics engine ingesting **13k events/sec** with column-oriented storage (130:1 write-read efficiency). Estimated **\$70k/month savings** over existing solution.
- Live dashboards and log search via RESTful APIs. Functionally equivalent to a real-time data warehouse for operational intelligence.

Forge: Agentic AI Development Workflow Engine | TypeScript, Claude Code, State Machines

- Built a multi-phase agentic AI orchestrator automating the full software lifecycle: requirements, design, implementation, review, and documentation. Uses structured state machines to coordinate long-running AI-driven tasks.
- Adopted by team for AI-assisted development. Used to ship two major SDK features in production.

TECHNICAL SKILLS

Languages: Java, TypeScript, Python, Go

Frameworks: Spring WebFlux, Node.js, Next.js, React, Hono

Databases / SQL: PostgreSQL, Cloud Spanner, MySQL, ClickHouse, Redis, MongoDB

Streaming / Messaging: Kafka, event-driven architecture, high-volume async processing

Infrastructure: Docker, GCP, Cloudflare Workers, CI/CD

AI / Tooling: Agentic AI orchestration, LLM-driven automation, prompt engineering

Practices: Agile/Scrum, TDD, code review, microservices, RESTful API design, security review

EDUCATION

BMSIT, Bangalore

Bachelor of Technology, Computer Science

2018 – 2022

Bangalore, India
